GTRC2000	2000	2400			4" Flange	75	57	74	4050
GTRC2250	2250	2700			4" Flange	75	57	74	4375

Capacity reflects 100°F/100 PSIG inlet condition and 100°F ambient. Dimensions and specifications are subject to change without notice.

## NON STANDARD CONDITION CAPACITY CORRECTION

												0.81

To obtain flow capacities at conditions other than standard (SCFM @ 100 PSIG, 100°F Inlet & 100°F Ambient), locate the multiplier at the intersection of actual operating conditions. Multiply the rated capacity of the selected dryer by the selected multiplier. The result is the corrected flow capacity of that dryer under corrected conditions.

Flow rates in excess of design due to capacity correction can result in increased pressure drop.
